

An in house training for our service length arm on new build inspection (Techni-con Container Survey Ltd) conducted on Dec 2018 for North and South China region.

The objective of training to share the findings amongst the team on dry and special equipment:

- Experience on water-borne paint which has implemented in container industry since 2017.
- Common defects found in used container, e.g. rust on hidden area and floorboard.
- Sampling taking on various container parts.
- Customer reporting

Last but not least the moral integrity amongst the team member adhere to code of conduct.
